

A study on the city planning based on universal design that is collaborated with Municipal corporation ,people, specialists and contractors in the underpopulated area

Ch. Takehiko Otsuka (Assoc,Prof, Akashi National College of Technology)

### [SYNOPSIS]

In recent year, the consideration to the old and the disabled person has been generalized. In the field of architecture, " Barrier free" and " Universal design " corresponds to that.

This paper aims on understanding the city planning based on universal design that is collaborated with Municipal corporation, people, specialist and contractor at Tajima area in Hyogo prefecture.

This study is to research the 3points:

The Project of Welfare furniture production in Tajima area

Case study barrier free on the Disabled person house and the enlightenment project about barrier free in Tajima area to investigate the equipment of barrier free on historic buildings, the law on the barrier free ,the historical building, to do the field survey(Kyoto City) and the questionnaire survey(case study Nakayama-Dera Temple in Takarazuka city).

Findings are mainly as follows.

- 1) The old who took part in training Welfare furniture production thrive on the works.
- 2) They could have an opportunity to discuss housing fee from danger. To Clear the barriers from Disabled person house contribute to Improvement in their living.
- 3) Most of Worshipers estimate that it is useful to clear the barriers from the historical building.. but it is difficult to clear the barriers from the historical building..
